Below is a screen shot of your main dashboard taken from your Google Analytics account. As you can see you have had 1,239 visits within January 4th - February 3rd. Of those 1,239 visits, they viewed your pages a total of 5,474 times. Which means, those visitors on average went to about 4 different pages of your site. About 64% of these people visiting your site were a new visit, that's great! Also I would like to point out your sites bounce rate (32.53%). **Bounce Rate** is the percentage of visitors who viewed only one page on the site. This percentage gives us a feel of how many of your visitors are actually staying on your site. This in turn suggests that the lower the bounce rate, the better!

All traffic sources sent a total of 1,239 visits

SEO Website Report

Above is a snapshot your traffic sources showing you a broad over view of how your visitors are arriving at your site, whether through direct traffic, referring sites, or using the search engines. 76.35% (946) of your visitors this month used the **Search Engines** to locate your site! About 18.00% (223) of your traffic was **Direct Traffic**, which are those visitors who know your site's domain name and are typing it in directly. 5.65% (70) of your traffic came from **Referring Sites**; these are other websites that you have your site listed on and your visitors are referred to your site through that site.
